DON'T GET HOOKED — THINK BEFORE YOU CLICK

What Is Phishing?

Phishing is a cyber scam where attackers send fake messages to steal passwords or personal data by pretending to be trusted sources like banks or government offices.

Warning Signs

- ⚠ Urgent tone or threats.
- ⚠ Unknown sender or weird email.
- ⚠ Links that don't match.
- ⚠ Requests for passwords or payment.

What Is Social Engineering?

Social engineering means tricking people into revealing secrets or giving access.
It includes scams like pretexting, baiting, tailgating, and impersonation.

How to Protect Yourself

- ✅ Verify the sender before clicking links.
- ✅ enable Two-Factor Authentication (2FA).
- ✅ Keep your system and apps updated.
- ✅ Don't share private data through email .
- ✅ Report suspicious messages immediately.

Common Attack Techniques

- **Email phishing – fake login pages or attachments.**
- **Spear phishing – using personal info.**
- **Vishing – voice phishing through phone calls.**
- **SMiShing – phishing through SMS or WhatsApp.**
- **Baiting – free offers or malicious files as bait.**

In Saudi Arabia

If you suspect a phishing attempt:
You can report phishing or online fraud to:

- **National Cybersecurity Authority (NCA)**
- **Saudi CERT**
- **Police Cybercrime Division / "Kollona Amn" app**
- **Official bank hotlines for fake messages**

Tip: Keep screenshots or links as evidence when reporting.
